PROJECTS

• FIRST PORTFOLIO STATIC WEBSITE

This is my first ever project which i worked on while i was learning HTML, CSS and Bootstrap. I choose to work on this project as in my view it was the complete package where i can implement my all the learnings of html and css along with bootstrap and make attractive website for myself.

Technologies used (HTML,CSS,Bootstrap)
Hosted on:-GItHub

• BUYKHARIBAOLI.COM(E-COMMERCE)

In this project I used HTML, CSS, Bootstrap, Javascript, JQuery, Ajax, PHP, PhpMyadmin and API. As per the client requirement i made the frontend and worked on backend using core php and to make SEO friendly used MVC pattern to complete the fast effective and responsive website.

• HealthyPET

This is the frontend desig for the animal care website . i Used HTML, CSS, Bootstrap to make this frontend.

• DETS-IT(ED-TECH WEBSITE)

Frontend and admin panel is completed .Remaining work:-few pages to make dynamic and add the facility to watch the recording of live classes. Technologies Used:- HTML, CSS, JavaScript, JQuery, AJAX, MYSQL, PHP, Bootstrap

ABOUT

I am a B.Tech final year student looking for new oppurtunity in field of java Tech stack as i have been working in java fron last few months and i am thrilled to work using java previously i have worked on PHP and now i am strongly looking for oppurtunity in java.
